

KEY BENEFITS

- » Best-in-class vulnerability management
- » Agentless configuration auditing
- » Powerful compliance policy engine
- » Agentless file integrity monitoring
- » Integrated Web application scanning
- » Unified reporting across the solution suite

TRIPWIRE SUITE360

SOLUTIONS FOR THE COMPLIANCE-DRIVEN ORGANIZATION

Tripwire® Suite360™ is a fully integrated, best-in-class agentless product line for auditing the entire information technology stack across a global network. Patented discovery technology ensures every asset on the network is proactively assessed for security risk and compliance. Tripwire Suite360 eliminates the cost and complexity of assembling and operating products from multiple vendors through an integrated solution with centralized management, objective measurement, consistent scoring and fast, agentless deployment. Its integrated architecture delivers cost savings through agentless design and time savings through unified risk and compliance reporting.

Tripwire Suite360 sets the industry standard for comprehensive vulnerability management, asset discovery and management, configuration and compliance management, accuracy, depth of coverage and analytics. With an ever-growing library of nearly 80,000 checks, Tripwire Suite360 offers the greatest breadth and depth of coverage for automatically discovering assets and vulnerabilities, applications, services, auditing configuration compliance and monitoring file integrity across an enterprise's entire network.

Tripwire Suite360 delivers:

- » Unified view of security and compliance in a fully integrated product line;
- » Streamlined IT decision-making with objective measurement, unified scoring, and analytics;
- » Automated, continuous auditing delivering cost-effective, sustainable compliance;
- » Faster deployment, instant results and low cost management using agentless technology;

- » Flexible pricing and deployment with a modular suite and subscription or perpetual licensing; and
- » Comprehensive asset discovery and auditing of the entire IT stack throughout both physical and virtual environments.

STAYING AHEAD OF CHANGING THREATS WITH VERT

A critical component of security and compliance auditing solutions is comprehensive coverage of the operating systems, applications, vulnerabilities and configurations found in enterprise networks. Tripwire's industry leading Vulnerability and Exposure Research Team (VERT) broadly monitors and researches across many original sources to deliver accurate, non-intrusive discovery signatures that are both current and relevant to large enterprises. New signatures are added regularly and are automatically updated on Tripwire appliances.

TRIPWIRE SUITE360 PRODUCTS AND SERVICES

IT GOVERNANCE, RISK AND COMPLIANCE

- » Tripwire Suite360 Intelligence Hub™ for IT GRC reporting, intelligence and analytics

AGENTLESS DISCOVERY AND ASSESSMENT

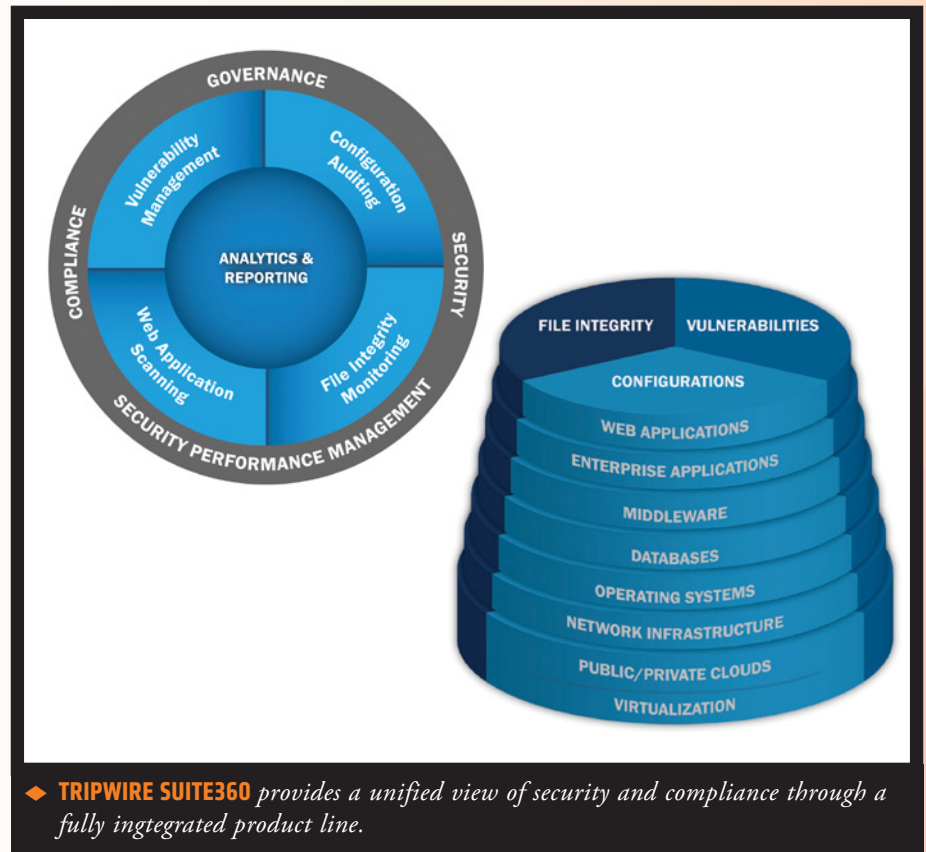

- » Tripwire IP360™ for vulnerability management
